## Introducing GOLD NANO: The Future of Gold Trading in Indonesia

Gold has long been considered a safe haven and a key component of diversified investment portfolios. As the financial markets continue to evolve, trading gold derivative has emerged as a sophisticated way to engage with this precious metal. We are excited to introduce GOLD NANO, our innovative derivative product tailored specifically for the Indonesian market.

### What is GOLD NANO?

GOLD Nano is a gold derivative instrument product using the Rupiah price, and the product size is only 1 gram. This product is designed to provide flexibility and affordability, allowing more investors to participate in the gold market without the need for large capital.

## Why Trade GOLD NANO?

**1 Affordability:** With a contract size of just 1 gram, GOLD NANO lowers the financial barrier to entry, making gold futures trading accessible to more investors.

**2 Local Currency Pricing:** Priced in Indonesian Rupiah (IDR), GOLD NANO eliminates currency exchange risks and makes trading more straightforward for local investors.

**3 Liquidity:** GOLD NANO contracts are traded on a robust and highly liquid platform, ensuring ease of entry and exit.

**4 Leverage:** GOLD NANO allows investors to control a significant amount of gold with a relatively small capital outlay, amplifying potential returns.

**5 Hedging:** Use GOLD NANO to hedge against price volatility in the gold market, protecting your investment portfolio.

**6 Diversification:** Add a valuable commodity to your investment strategy, reducing overall portfolio risk.
